

**Supplementary Table 3.** Univariate analysis for risk factors associated with ARDS in aSAH patients

Variable	ARDS	P-value
Sex (male)	2.07 (1.52–2.80)	0.04
High grade aSAH	2.50 (1.79–3.50)	0.02
Pneumonia	4.35 (2.64–7.18)	0.01
SIRS	16.29 (5.45–48.68)	0.02
Sepsis	1.39 (1.00–1.94)	0.42
Delayed cerebral ischemia	1.05 (0.77–1.44)	0.90

Values are presented as odds ratio (95% confidence interval).  
ARDS, acute respiratory distress syndrome; aSAH, aneurysmal subarachnoid hemorrhage; SIRS, systemic inflammatory response syndrome.
